VĒN

ADVENTURE

VEN Architecture was established in 1991, in Ankara. The branch office VENistanbul was established in 2012. VEN is a national- international award winning company that concentrates on contemporary-creative design. From building complexes to a single building, architecture, restoration, consultancy and interior design services are provided. VEN as a young company aims to establish a balance between traditional wisdom and contemporary vision.

Projects of the company have been published in many publications and displayed in various exhibitions. Through professional experience, with its architectural team, and close observation of ever-evolving technology, VEN strives to provide quality architectural services.

VEN is committed to achieving the optimum results through precise analysis and decision-making in collaboration with client throughout the project. The objective of the company is to find the best solution for the clients and environment being conscious of how architecture shapes life. In order to improve continuity and quality, VEN considers the importance of knowledge, professional education and research.

ARCHITECTURE IS AN ENDLESS ADVENTURE FOR US

GÜL GÜVEN

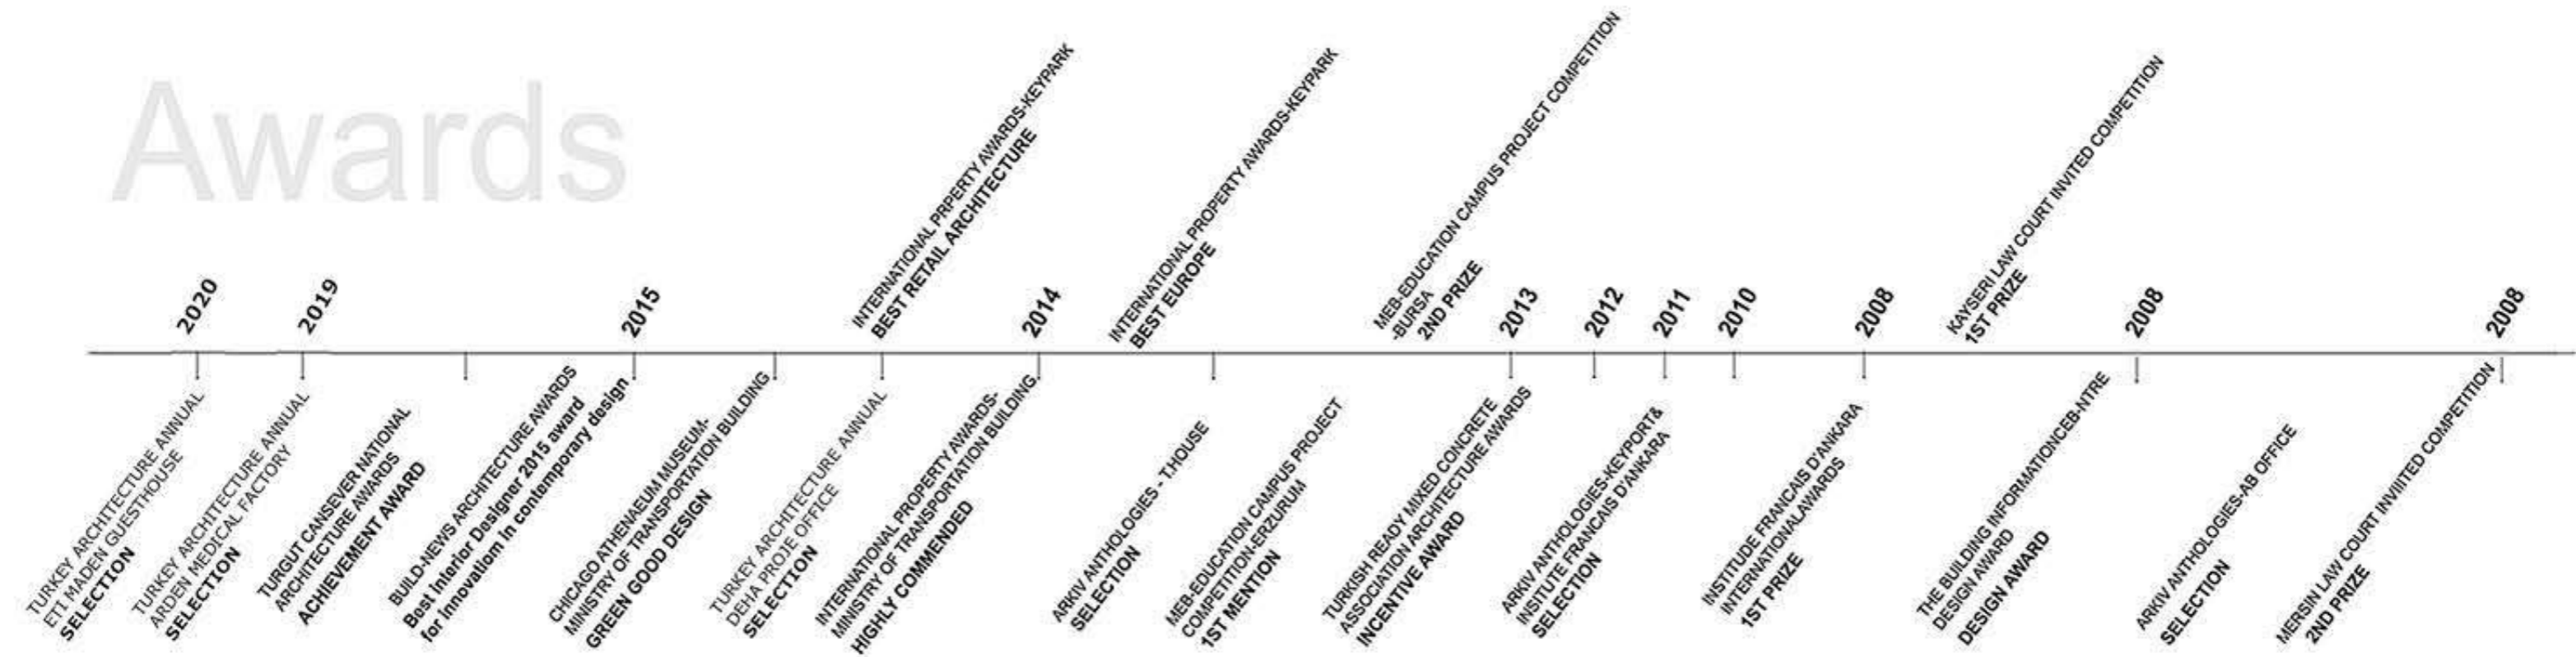

Gül GÜVEN received her BS degree in architecture from Istanbul Technical University, years between 1984 and 1988. After graduation, She attended Middle East Technical University, Architecture Faculty and achieved her MS in Restoration in 1993.

She founded VEN Architecture in 1991 in Ankara. The branch VENistanbul joined in 2012. The company continues to work on many projects both locally and internationally.

She has received prestigious awards from competitions she attended. Green Good Design (2014), International Property Awards (2014), WAF (2013), Turkish Ready Mixed Concrete Architecture Awards (2012) , Kayseri Courthouse (2009), YEM Design Award (2008), French Cultural Center (2008) were some of her important accomplishments.

She also worked as a part-time instructor at the Architecture Department of Hacettepe University and Çankaya University in Türkiye from 2003 through 2009. Güven has also served as a jury member at Ankara Courthouse and Knauf -Design competitions. Additionally, she was speaker at many architectural and design seminars, congress and panels such as Sinan's Week, Archild Congress and Building Information Methodology in Sustainable Architecture. Güven is a member of the Chamber of Architects of Turkey, RIBA, TSMD (Turkish Association of Architects in Private Practice), Korder (The Association of Restoration and Preservation), Kagider (Women Entrepreneurs Association of Turkey)

The project for the headquarters building for the Turkish Ministry of Transport, Maritime Affairs and Communication is an expression of our commitment to sustainability and our ambition to produce high-quality design for public buildings. Once completed the building will be the most eco-friendly public building in the country and a new symbol of open government.

The building's glass exterior and brightly lit, spacious interior spaces are designed to represent transparent democracy. Much emphasis is given to accessible design with urban and social integration.

The building has a gross floor area of 51,000 m² and consists of three interconnecting blocks. The minister's office and other VIP areas are located at the jewel-like front block facing the main road. Other offices are located at the high-rise block with the dynamic form. The third block connects the front and the high-rise block used for employee and visitor entrances.

Sustainability is the soul of this building. Renewable energy sources are used throughout. The goal is to get LEED Platinum certified. To save energy, passive design through good orientation, natural lighting, heating and cooling is employed. Wind turbines on the rooftop, PV solar panels, solar collectors, tri-generation systems, geothermal energy, grey water and rainwater recycling systems, LED lighting, and daylight sensors are also used in order to make this building a showcase for government's view towards sustainability.

PTT E-TRADE BRANCH EXPERIENCE

As a well-established post office in Turkey, and more recently serving as an intermediary institution for the transactions of 25 million people, PTT commissioned us to design a more dynamic, modern and innovative brand and a new branch concept. PTT has been at the forefront of communication and servicing the Turkish population for over 170 years.

Informed by our Research & Insight and Brand Definition processes, and acting as advocates for our clients' target audiences – religiously starting from and examining the customer's point of view – we work collaboratively to 'storyboard' the perfect encounter between customer and space.

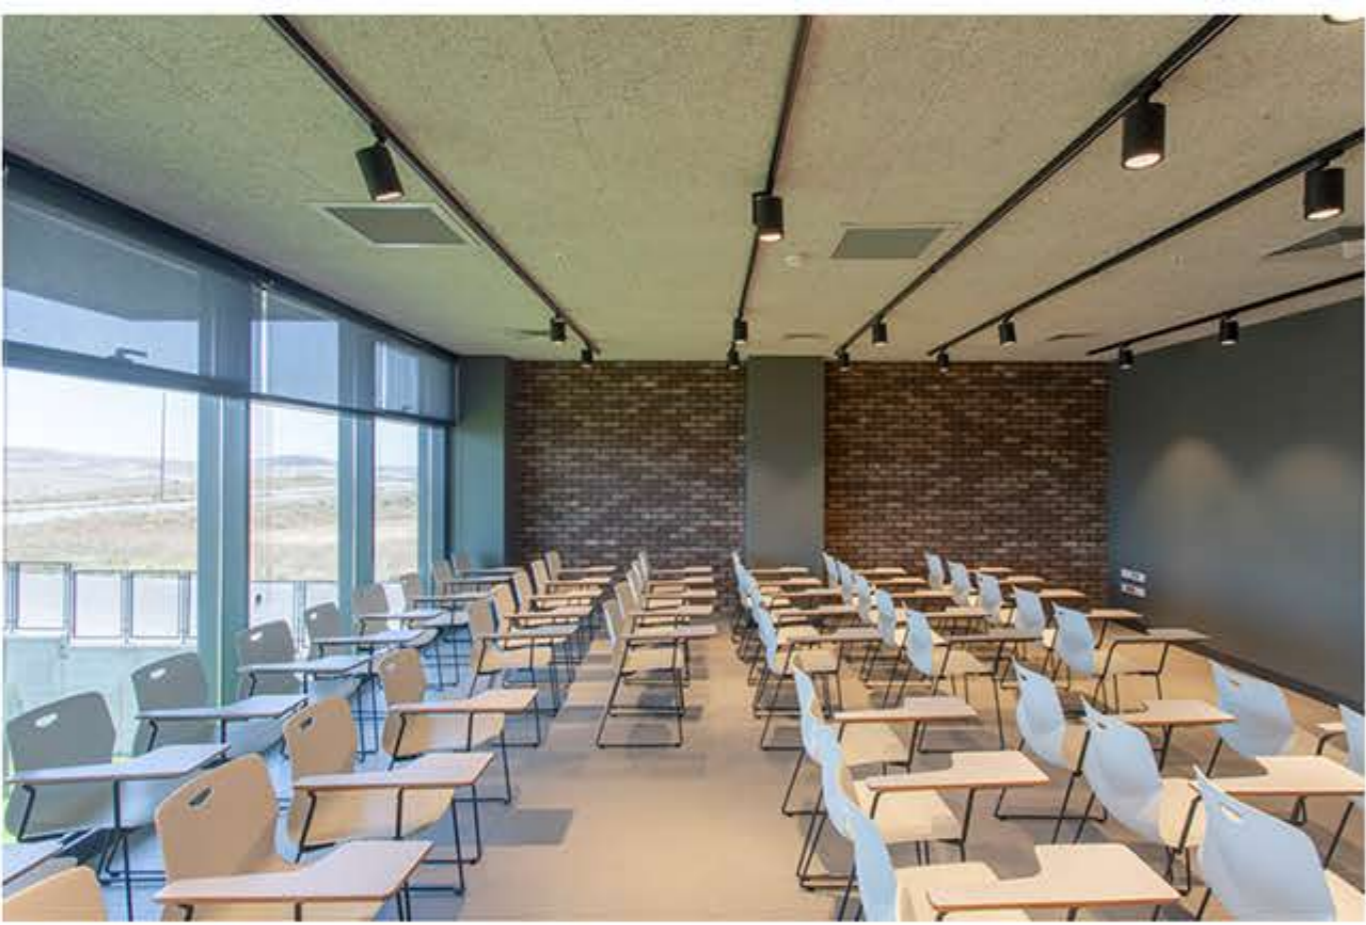

ELSA Orthopedics has been operating in the fields of orthopedic supplies, varicose veins, physical therapy products, sports performance equipment, respiratory function test systems and sports health products since 1998. ELSA Orthopedics is a preferred company in the sector with its quality products, customer satisfaction oriented service concept.

Türk Telekom owns 177 years of established history, is Turkey's first integrated telecommunications operator.

"Turkey's Multi-Player" Türk Telekom, as of June 30, 2018 of 14.1 million fixed access lines, serving 10.3 million and 20.2 million mobile broadband subscribers. Turkey Türk Telekom Group companies with the vision of accelerating the process of transformation to meet the new technologies and information society, serves 81 cities in 33 615 employees.

Think Tank | SETA

SETA Foundation for Political, Economic and Social Research is a non-profit research institute dedicated to innovative studies on national, regional, and international issues. The objective of SETA is to produce up-to-date and accurate knowledge and analyses in the fields of politics, economy and society and inform policy makers and the public on changing political, economic, social and cultural conditions. SETA evaluates national and international issues in an historical and cultural context.
